- Partner in CineLink Co-production Market 2007, held during the Sarajevo Film Festival. Here 15 selected feature film projects in development from Southeast Europe will be presented. Also, the annual Cine-Regio Talks in collaboration with Screen International will take place, – the topic is “New Windows - Opportunities & Challenges”.
- Furthermore 2007 will see the launch of Docu-Regio, a new documentary pitching forum initiated by twelve European film funds. The aim is not only to organize training for European regional documentary producers, but also to create a network of parties interested and ready to fund and promote creative documentaries. Workshops will be held in Vienna (June) and Lille, France (Oct.)

Secretary General, Charlotte Appelgren: *It is a great honour today to be able to welcome 7 new members, including three regional film funds outside the EU. Indeed they will play a significant role in securing and further stimulating the cultural, artistic and creative exchange throughout Europe. The regions in Europe represent an increasing share of the public support in the audiovisual sector. Today it stands at 21% and this figure is growing, according to the European Audiovisual Observatory.*

Cine-Regio's activities in Catalonia and Sarajevo later this year will no doubt benefit the film sector and the audience both at a regional, national and European level. Gathering the heads of European regional film funds, together with producers, talents and distributors are a unique opportunity to achieve a number of goals, including strengthening the co-development and co-production of films between regions, promote the film sector and establish new international friendships and contacts.
